

Eva Natinsky is a PhD candidate at the University of Texas at Austin, specializing in nanoscale design and manufacturing, with robust expertise in leveraging machine learning to optimize image reconstruction and data management for advanced nanometrology. Her research has significantly enhanced atomic force microscopy through innovative use of computer vision and sophisticated modeling techniques, CAD-based visualization and distributed machine learning algorithms. As a graduate intern at Sandia National Laboratories, Eva applies advanced machine learning algorithms to improve sparse image reconstruction for nanometrology. Recognized with prestigious awards including the NSF Graduate Research Fellowship, she has a proven track record of impactful research, underscored by multiple peer-reviewed publications and conference presentations. Eva possesses additional experience in advanced microscopy techniques, 3D scanning, and CAD modeling, highlighting her multidisciplinary expertise in both research and practical applications.

---

## EDUCATION

---

**University of Texas, Austin TX**

Advisor: Dr. Michael Cullinan

Nanoscale Design and Manufacturing Laboratory

Cumulative GPA: 3.89 on a 4.0 scale

*PhD. Engineering*, est. Summer 2025 — *Current*

**University of Texas, Austin TX**

Advisor: Dr. Michael Cullinan

Nanoscale Design and Manufacturing Laboratory

*M.S. Engineering*, 2022

**Austin College, Sherman TX**

Major: Physics

Minors: Math, Spanish

*B.A. Physics*, 2019

---

## EXPERIENCE

---

**University of Texas at Austin**

*Graduate Researcher*, 2019 — *Current*

*Graduate Researcher in the Nanoscale Design and Manufacturing Laboratory*

Advisor: Dr. Michael Cullinan

- Data management for machine learning in accelerating nanoscale characterization methods
- Optimization of large-scale nanometrology (atomic force microscopy) and error correction techniques using high-performance computing.
- B-spline curve and NURBS surface modeling of 3D AFM data in python.

**Sandia National Laboratories**

*R&D Intern*, 2021 — *Current*

*Graduate Research Intern at the Center for Integrated Nanotechnologies*

Advisor: Dr. Rémi Dingreville

- Nanometrology data analysis and sparse image reconstruction with machine learning and high-performance computing systems.

## **Machined Form Design**

*SolidWorks & CAD Intern, Summer 2019*

- 3D scanning (FARO 3D Scanner, Geomagic Wrap Scan Processor) and SolidWorks CAD modeling for custom automotive redesigns and builds.

## **Austin College**

*Physics Teaching Assistant, 2018-2019*

- Lab teaching assistant for Introductory Algebra-Based Physics class.

*Office of Admissions Intern, 2015-2019*

- Lab teaching assistant for Introductory Algebra-Based Physics class.

*Undergraduate Researcher, 2016-2019*

Advisors: Dr. David Baker, Dr. Donald Salisbury

- Photometric observations from the Adams Observatory in Support of NASA's TESS Mission.
- Modeled the behavior of gravitational waves and back reaction in a binary system in *Mathematica*.
- Photometric observations of confirmed exoplanets in support of the KELT-FUN collaboration.

## **University of Michigan Ann Arbor**

*NSF Sponsored REU, Summer 2018*

Advisor: Dr. Jennifer Ogilvie

- Studied the reaction center of the photosystem II complex in spinach using ultra-fast interferometry.

## **Rensselaer Polytechnic Institute**

*NSF Sponsored REU, Summer 2017*

Advisor: Dr. Vidhya Chakrapani

- Designed in SolidWorks a model for the XENON experiment in Italy.
- Studied changes in electric properties of transition metal oxides.

## **University of Texas at Austin**

*Undergraduate Intern, Summers 2015-2016*

Advisors: Dr. Ron Matthews, Dr. Luis Sentis

- Longhorn Racing automotive engineering lab, working on designs to help improve engine performance efficiency.
- Human Centered Robotics Lab, studying augmented reality C++ programs.

## **ATX Machined Form**

*Founder/CEO, 2014-2016*

- SolidWorks CAD modeling and CNC milling to produce billet aluminum drink coasters with custom automotive or logo designs.

## **Kustom Krates**

*Intern, Summers 2011-2016*

- SolidWorks CAD modeling, CNC machine operation, NC Milling, and 3D scanning (FARO 3D Scanner, Geomagic Wrap Scan Processor).

## HONORS & AWARDS

---

- National Science Foundation Graduate Research Fellow, 2021-2024
- Virginia & Ernest Cockrell, Jr. Fellowship in Engineering, 2019-2023
- T. W. Whaley, Jr. Friends of Alec Endowed Scholarship from the University of Texas Cockrell School of Engineering, 2019-2020
- Mary Foulks Gourley & Lloyd E. Gourley Prize for an Outstanding Student in Physics, 2018

## POSTERS AND PRESENTATIONS

---

- Presentation:* “Integrating multimodal metrology with machine learning for reliable characterization in advanced chip packaging.” Truman fellowship finalist proposal presentation, January 2025.
- Presentation:* “Accelerating microscopy for nanoscale fabrication via deep-learning image reconstruction.” UT Austin PhD research proposal, April 2024.
- Presentation:* “Deep learning image reconstruction for microscopy data.” Sandia National Laboratories BeyondFingerprinting Grand Challenge External Advisory Board Meeting, April 2024.
- Poster:* “Reconstruction of sparse, nano-scale metrology data for efficient process control.” Sandia Academic Alliance Spring UT Austin Research Poster Session, March 2022.
- Presentation:* “Signal reconstruction of sparse, nano-scale metrology data for time efficient process control.” IS&T Electronic Imaging Symposium, January 2022.
- Presentation:* “Signal reconstruction of sparse, nano-scale metrology data using Noise2Noise.” Sandia National Labs Academic Alliance Program, July 2021.
- Poster:* “The role of visualization and error correction in very large area, tip-based topography measurement.” American Society for Precision Engineering annual conference, October 2020.
- Poster:* “Detection of exoplanets at the Austin College Adams Observatory.” Austin College Scholarship Conference, March 2018.

*Poster:* “Studying transition metal oxides by tracking electrochemical reactions.” NSF sponsored REU at Rensselaer Polytechnic Institute, August 2017.

*Presentation:* “Using ultrafast laser-pulse spectroscopy for observations of photosynthesis in spinach.” NSF sponsored REU at the University of Michigan at Ann Arbor, August 2018.

*Presentation:* “Simulating the back reaction in gravitational waves with a spring-mass system.” Austin College Scholarship Conference, March 2018.

*Presentation:* “Observing exoplanets with the Austin College Adams Observatory for admission in to KELT.” Austin College Spring Research Presentations, April 2017.
